

Smarter Cable Solutions. Engineered for Safety.

ASG Power's Hazardous-Rated Cable Assemblies are crafted to excel in extreme temperatures and explosive atmospheres—designed, assembled and tested to perform when failure is not an option. With more than 20 years of experience, our cable assemblies are designed to deliver maximum reliability and reduce operational risk.

We provide:

⚡ Multi conductor
power and control
cables

⚡ Custom cable
harnesses tailored
to your needs

Engineered for Safety. Built for Reliability.

Durable

Potted connections
prevent arcing

Certified

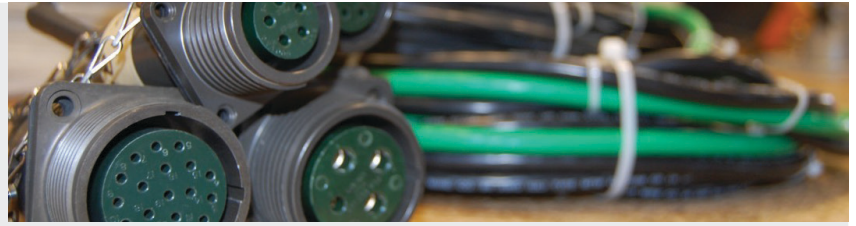

Assembled to
IPC/WHMA A 620
standards

Customizable

Designed to
meet your spec'd
lifecycle and
connectivity

Turnkey Cable Assemblies. Ready for Any Challenge.

Our in-house production includes dedicated assembly, wire cutting, testing and inspection to deliver a field-ready solution. Every assembly is built in our Rocky Hill, Connecticut facility, ensuring complete traceability and quality control.

Typical offerings:

- Control and power multipair cables
- Custom overmolding and sealing
- Rugged connectors for extreme temps and conditions
- Assemblies up to 200 conductors, 5 kV HIPOT tested

Ideal for Critical, High Risk Applications

We serve industries where failure isn't an option: oil and gas, petrochemical, industrial automation and more. If your project demands certified safety, robust connectivity and tailored solutions, we've got you covered.

How We Work with You

- 1. Talk to an expert** – Discuss specs and applications
- 2. Get a quote** – Customized to your project
- 3. Start your build** – Quick, quality first assembly and delivery

What Our Clients Say

“ASG’s precision to detail... always producing a top quality product.”

— Christopher Hickey, Field Service Engineer
